**Heritage Glazing  
Solutions LTD**

Manufacturers of thermal  
and acoustic glazing products  
including aluminium  
secondary glazing

Heritage Glazing Solutions Ltd has over 30 years of experience in the glazing industry, now specializing in thermal and acoustic fenestration for both commercial, trade and domestic sectors.

The Wolverhampton factory manufacture all our own aluminium secondary windows. All components are sourced from within the UK to ensure high quality and minimal lead times. All waste from the manufacturing process is recycled, no part of our product goes to landfill. This all combines to make sure Heritage Glazing Solutions has a minimal carbon footprint.

### Why choose Secondary Glazing?

**Restrictions placed by local authorities** - Grade I or II listed buildings or properties within a conservation area are not permitted to change and upgrade their external windows. Secondary windows installed within a property provide glazing suitable for the 21st century while maintaining the property's external traditional appearance with the benefits of increased thermal and sound insulation.

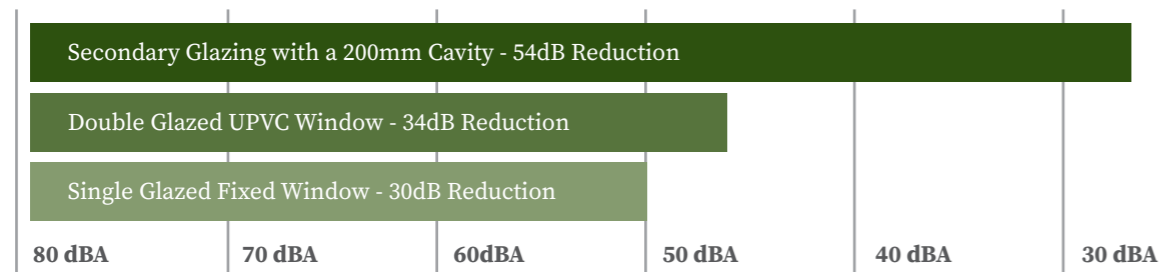

**Low-Cost Solution in any circumstance** - Secondary glazing is a perfect way to keep your property warm in winter and cool in summer. It also increases the acoustic benefits to existing glazing solutions (see table below). Secondary glazing can be fitted both where traditional glazing or double glazing is already installed.

**Where condensation is a major issue**, we often specify secondary glazing with balanced ventilation. This stops the inner glass from becoming too cold and prevents condensation from forming on both the primary & secondary windows.

Heavy Traffic

Whisper

Noise At Street Level

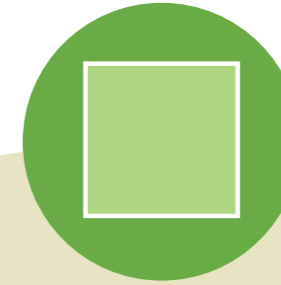

Sound Pressure Level (dBA)

We manufacture different styles of secondary glazing to cater for every application

Horizontal Slider

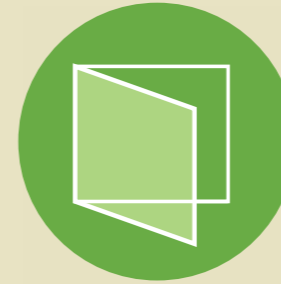

Fixed Windows

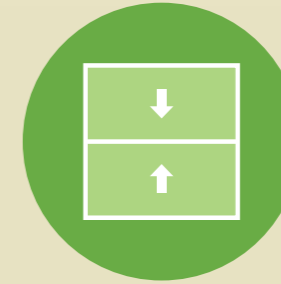

Lift Out Windows

Hinged Casement

Vertical Slider

Bespoke Design

We use slimline aluminium for our secondary glazing as it is strong and ensures no light is lost. Every glazed unit comes with toughened 4mm glass as standard. There are upgrades available to suit your needs. Units come white as standard, other colours are available upon request.

Every order is unique, all secondary units are individually tailored for each client and application. This means we can meet your needs regardless of whether you are looking for solutions for a listed building, modern office, hotel, park home or even your caravan.

We offer a fully comprehensive package covering survey, advice, delivery, and fitting on all our products to make sure you get the greatest benefit.

All products come with our 10-year guarantee.
